

	<u>Curriculum Overview Form: JW/EH</u> <u>Term: Summer 2 25/26</u>
	<u>Communication, Language and Literacy - Jessica Williams</u> Animals Around the World This half term, pupils will explore animals from different habitats around the world through engaging sensory experiences, stories, music, and interactive activities. They will develop their communication, vocabulary, and literacy skills by learning animal facts and contributing to a class non-chronological report about their favourite animals. Our visit to Africa Alive! will enrich this learning by giving pupils the opportunity to see a variety of animals firsthand and experience different habitats in a real-world setting. All pupils access regular, individualised phonics sessions to support reading, in addition to weekly visits to the library.
	<u>Mathematics - Emma Hall</u> This half term we are exploring time. As a class we will discuss how we know when it is time for certain things during a typical day (lunch, bed, etc), the concept of time and how we know time is passing, in addition to some work with both digital, analogue and talking clocks. We will think about how some technology such as Alexa's and alarms can help us plan our day and why knowing the correct time is important.
	<u>Creativity - Art - Rebecca Barry</u> This half term, we will be learning about using natural materials to make sculptures. We will be inspired by artists that work with natural materials and will create our own sculptures including faces, wind chimes and other tactile sculptures. Skills that we will be working on include: making changes to our work as we go along until we are happy with it; using three dimensional space and working with 3D objects.
	<u>Creativity - Music - Emma Ewins</u> Pupils are learning songs to perform at our summer festival Clarefest, including a fabulous rendition of 'My Favorite Things' from the sound of music to which they will write their own verse. Pupils are focusing on their favourite music that they enjoy singing, dancing and playing to, creating a musical identity.

	<u>The World Around Me: Science - Emma Hall</u> This half term the theme for Science is Forces. We will discuss key terms such as ‘push and pull’, think of examples of how these forces are used in our environment and complete some interesting experiments during weekly lessons, thinking about how we can make objects move in different ways.
	<u>The World Around Me: Humanities - Jessica Williams</u> Geography – Water Cycle and Rivers This half term, pupils will explore the theme of water, learning about where water is found, how it moves, and the journey it takes through the water cycle. Through a range of sensory, practical, and interactive activities, pupils will investigate rivers, rainfall, and the different ways water can be experienced in the world around us.
	<u>The World Around Me: ICT - Kevin Stoner</u> In the summer term the pupils will be introduced to the concept of computer coding. This initially will be in the form of giving the correct instructions to a character to complete the task. This will be expanded to include a wider set of instructions. They will have the opportunity to correct any mistakes made. In online safety sessions the pupils will learn how to use technology responsibly including the length of time using screens and online as well as computer gaming.
	<u>PSHE, SRE and Citizenship - Emma Hall</u> Pupils will continue to work through the School’s Happy, Healthy safe framework. This half term the focus is on the different jobs people do and why. PSHE is often incorporated into other sessions, so we will be continuing last Half Term’s maths work, talking about money, and approach the theme of different jobs through role-play and hands on experiences during Life skills etc.
	<u>My Physical Development and Wellbeing</u> Swimming - We will be swimming every Wednesday this half term. Physio - All pupils complete their physio routine first thing in the morning, followed by a gentle yoga routine. Time in standers and walking frames are timetabled into the week as per their plans. Rebound - Pupils can access Rebound therapy weekly, where they follow the Winstrada programme at their own pace.

P.E - Gary Hydon

Summer Term 1 - Target Games – To play a variety of games in pairs and small groups.

Summer Term 2 - Athletics/ Outdoor activities.

A range of athletic activities to encourage movement, throwing and coordination.

To use the outdoor equipment including bikes, swings, go-karts etc

Home Learning Opportunities

Please contact us directly for any individualised learning activities, if this is something you would like.

Earwig

- Please don't forget that pictures of your child's learning in school are accessible on Earwig.
- You can also show us what they are up to at home by uploading your own pictures onto Earwig if you would like.
- If you need any help or support with this then please contact Matt - matthew.clackett@clareschool.co.uk.
